Objective

"Motivated and enthusiastic engineering student with a strong foundation in programming, problem-solving, and technology. Passionate about learning new skills and applying theoretical knowledge to real-world projects. Seeking opportunities to gain hands-on experience in software development and enhance my technical and analytical abilities. Eager to contribute to innovative projects while continuously growing in a dynamic environment."

Education

Currently pursuing B.E **Electrical and Electronics Engineering** in kongunadu college of Engineering and technology

12th of S.R.V matriculation higher secondary school, india, thanjavur

with 90%

10th of S.R.V matriculation higher secondary school with 80%

Internships

PCB Designing

learner, india, trichy

July 2024 - August 2024

projects

Regenerative Braking to Increase Battery Efficiency

This project is based on braking system related to electric vehicle to save time while charging and improve battery efficiency

Home Automation using IOT

This is my second project this is more useful to the disable persons in this project crated voice controlled home automation using ESP32

Certificate

completed value added course in **Auto CAD**

completed value added course in **MAT LAB**

presented poster presentation in SNS college and won first prize

Skills

Java

Beginner

HTML,CSS (Basics)

Java script (basics)

Excel (Basics)

MS Word (Basics)
